WEB DEVELOPMENT

Name: MAYUKH MALLICK
Section: B18
1st year student
Id: 1806391

About the project:

The project was given by Mr.Srijan and Mr.Anmol, our mentors in web development classes. The project consist of image gallery,video gallery and two games :Tic-Tac-Toe and Click-counter game.

Approach towards the project:

In the project, being quite novice and amateur coder and also a first big try,I have tried to make the page simple looking,interface friendly and easily navigation access to webpages' elements. Dark theme has been applied as the demonstration of the webpages will be done in a dark room and also a dark theme makes it big unique just like windows phone theme.

Conclusion:

I have given my best efforts in making the web pages and I hope the viewers will like the pages.
